SureLab SL-D1000

Wi-Fi® + Ethernet   Direct

The SureLab SL-D1000 Series of compact photo printers with duplex capability for flexible commercial production.

The series has been developed for photo shops, professional photographers and businesses that need to print high-quality photos and offer customers a wide range of products, including personalised photo books, cards and calendars. Businesses that could benefit, include: photography retail, event and photo box, stationery, hotels, cafés, bars and restaurants.

Productivity

The SL-D1000 Series features impressive print speeds of up to 385 pph[1] with no compromise on quality. Cartridges have been replaced by Epson's Integrated Ink Pack System ink bags, providing 25% more ink than their predecessor, resulting in fewer ink changes, reduced downtime and less waste. Productivity is also improved when used in combination with the optional duplex feeder (included in the SL-D1000A).

Flexibility

They're lightweight, with small footprints, and feature Wi-Fi/LAN connectivity. The user can make the best use of available space and place SL-D1000 Series printers almost anywhere, and integrate into an existing infrastructure. Thanks to the new heating system, noise level and power consumption are reduced, keeping the printing both customer and eco-friendly. They're also capable of printing on a wide range of media.

Quality

The UltraChrome D6r-S ink system provides superior image quality. The wide colour gamut delivers detailed images and realistic skin tones with smooth tonal gradations and deep, natural blacks with the superior gloss level of a dye-based printer.

Reliability

The SL-D1000 series has been developed to keep the user running for longer with product lifetimes of 400k prints (15x10cm). Also, with New Nozzle Detection Technology they're capable of identifying missing and misaligned nozzles.
